

Exercise 1: Analyze the Bitcoin ownership and transaction mechanism

a) The true nature of "owning" Bitcoin

It is impossible to assert that Mr. A says that "this paradise is based on the basis of its nature" is not correct.

- There is no amount of "Confidentiality" that is left lying around that is considered a waste of money.

- She is afraid of being "scared": "Afraid of being scared" is that she has the right to be a mother, so she has a strange name (UTXO) that is placed next to her wife. This power is fully realized through the gift of Pri and Te Key (Kho à ri ng tu).

- And the word "Ve": "Va Batcoon" (the above software that has the same meaning/conformity) is a common word (Ky Mangàgêmd), which refers to the form of a warehouse, the storage of a warehouse and the land of tea, not the land in the land.

- Normal caesarean section: The ceramic plug is used to conserve cataracts, which is called a condensation and a condensation (simply called UTXO) which is said to be condensed and stagnant because of the cavities and nodes in the condensate, but not at the full margin. I got hit by an owl.

b) Ability to cancel transactions and recover funds

On top of that, I have no idea what I'm talking about, but Mr. A doesn't agree that he's going to go to his house. Reason for swearing:

- Betrayal of the wrong person (Decentralization): The card is not affected by any big or big card holder and there is no chance that he will be hit by the devil or the treasury. Therefore, there is absolutely no "total liquidity" or support for any customer who wants to buy a house, a farmer, a foreigner or a wealthy person.

- Immutability: A different form of speech is proposed in a block and a house or house (confirmations), which cannot be controlled or decomposed. Proof of Work (PoW) and Proof of Work (PoW) are clear positions that are not completely feasible.

- Household rafters: The more a woman's stomach is full and the more she eats a foreign dish, the more serious and resistant she is to foreign food.

c) Security of assets when the Private Key is exposed

The old house is not completely safe, it is not enough to use it on the land.

- And the ash to vo vo ng à Privâtê Key: Da y is the vo ky house t u ng the subject to show that the right is afraid of hu ú ta ò s n and the wrong ky ky ky ky ky s tu ú tye n. In the phrase "Baccoin" in Vietnamese, "you're still there, you're still in the water".

– The object of the sentence is not to be used: The word is to be used as a representation of the sentence for the software for example on the device A. If the sentence is connected to the command line, we can import this item and register the application. Which wallet is different from the other device?

The rights to the contract and the rights to the contract are not necessary but can be used on the subject of the agreement.

– Ha ú quà: The position that harmonizes with Privatê The position of the husband and wife is the position in which the masonry is adjacent to the foreign object that supports the A.

Exercise 2: Compare Ledger Architecture and Security Mechanism

a) Table comparing centralized ledger and distributed ledger

Criteria	Centralized ledger (Bank)	Distributed ledger (Blockchain)
Rights and obligations	Thousands of ash and ashes hit the coffee net, which is the house's uncle who stores the coffee and keeps the ashes on the floor for the people to use.	This kind of evil is completely through Pri and Qi Ke. The patient's circulation is not measured by the third-panel surface (TPT).
Mrs. Ch's smoothness	Even thousands of women have the right to drink coffee and drink soy sauce.	All foreign languages are treated more than others. She signed a contract with the foreign minister.
The house is filled with wealth and prosperity	Thousands of customers are committed to supporting the wealth that harmonizes the land of coffee and property issues for customers.	There is no customer support. If you want to pay for it, you will have to pay for it.

b) Double Spending prevention mechanism in Bitcoin

In the case of Cryptocurrency, although there are not thousands of coins, but the number and thousands of units of a certain amount of money lost is usually the amount of money lost:

– Translation mission map: The block maintains the entire translation mission department in veterinary medicine (Genêsis). When a different word is used in the house beam, the sentence "Input" is called "da s ti ú".

– Nodes: Nodes in the earth's surface are connected to the soil and are compatible with each other. If a person has a common character, the word "input da" is called "da chi ti u", and the correct and fourth language for a different person is p quad.

– Xứ ly giao dị ch xúng đo t: Nề ú hài giao dị ch mà ú thúà n (cú ng tiề ú mo t ngúo n tiề n) đứợ c gứ ị đị cú ng lú c, hề tho ng sề chợ xềm giao dị ch nà o đứợ c đứà và o kho ị (Block) tiề p thềo trứợ c. The child's abnormality is considered unsuitable and dehumanized.

– Animal food market: The more women are fed and treated with fluids, the more they eat and drink fluids, the more they support their ability to digest food.

c) Risk analysis of 51% attack

If a group of miners gets more than 50% of the total power (Hashràtì) of the village, they will be able to swallow a small amount of money and be forced to rely on the evil people to learn.

Behaviors they CAN do:

- Dao c o c ch ch ch ch ch ch nh nh nh: Th c s h t h s t h e s t u d u p (Doublên Spênding)
Mrs. Cuc T is saying that she has to say a thousand words to her mother.
- Thousands of foreign languages: They are willing to give house soaps and stable foreign languages, no foreign language.
The fluid cannot be stored in the stool.
- Modal physical and mental cough:
- Prejudice and Other Objects: They don't have Pri and Qi and Cue and other people have no basis.
Let's go back and forth with the four concordances to refer to the other quadrants.
- Tà o ra Giac gia: They don't swear that the teacher will measure the evil and what is the subject of the problem?
The teacher must pay the required amount of inventory.
- The teacher measured the soap's porcelain history: But it has 51% of the capacity, so the position is that it's a stone's throw.
tonnage and warehouse due to the location of the warehouse adjacent to the warehouse and the need for total computing power
Don't worry.
