

Exercise 1: Analyze the Bitcoin ownership and transaction mechanism

a) The true nature of "owning" Bitcoin

It's not correct.

- No amount of "Blocked money" can be saved on your computer properly.
- Banchàtcuà:"fearhuhuu": "Fearhuhuu"consciousnesschat is the position ofbànnàmiqúyquyyynàtcàc UTXO is the right to marry the local wife. The right to control This is the first thing to happen.
- Anditrocuàvi:ViBaccoin (software on computer/phone) cuquànlykhoà(KyMànàgêment), duđìtào khoà, luctrukhoà and alkalinetràsodôa not stable in measurement.
- What's the problem? UTXO is supposed to be absorbed by nodes in the membrane, not by What are the branches and branches?

b) Ability to cancel transactions and recover funds

Based on the co-operative nature of Bhikcoin, Mr.Akhong swears to be a temple. Lydocúthhsàú:

- Characteristics of Phuptàpttung (Decentralization): Bútcoinkhongtàttàtbàtbàtkyđinhphu What's the point and don't you feel like you won't win at all. Dodo, completely no"tongdaiBaccoin"let'sbophosupportcustomersrecommendinghomeyuuhuy What's the difference?
- Silence: Immuta is introduced into a block and nhàndúcàcxàcnhàn (confirmations), nokhongthèbisừàđoìhoàcxoàbo. Cộchềbàm (Hashinh)andProofofWork(PoW)proofofWork(PoW)proofofwork(PoW) Tonkin and gannhhut can't swear.
- Betting on the soap: The more you get into the game, The integrity and the ability to not be able to dig up the translation is even worse.

c) Security of assets when the Private Key is exposed

It's not completely safe, it's getting better and better every day.

- AnditrototouthucuuàPrivateKy:This iscongcudúy nhatdútdúyyyyyyyyyyyyyyyyyyyyyy than than ever afraid of huuutàisandtàohuuttientudìkyyyuttttttinhutttien.Inthhuuttientuptien, "ahigiukhoà, ngìdoguthitien".
- What's the answer?: What's the answer? The soft part on the device is A. If the snake is Pried, we will accept it. (import)This course is on the correct application.Others are on the other devices.

a) Table comparing centralized ledger and distributed ledger

Criteria	Centralized ledger (Bank)	Distributed ledger (Blockchain)
The right to control	The dong dong and tritro trots of the temple are the uncles of the house who serve them and give them the right people.	Ngu didnàmutàisàn completelythongquàPri andteiKy.Hethonghoadongkhongcạnndur thàbà (TPT).
Pure personality	Nine branches of the musculoskeletal system have the right to extract and contain alkaline tea.	Every translation is used on everyone. Backya also vow to control the history of translation.
Khanhkhophuctàisàn	The industry is committed to providing support to customers.	If you don't know how to support the customer, if you pay the price, you'll be able to meditate on the edge.

In the case of money, the industry is not controlled, the membrane and thousands of people are affected by the loss of money:

- Curriculum translation: Blockchainhlucutrutallbolichtranslatesfourkhoikhohi Thuy(Gênêsis).Khimot goodĩđđđđđđđđănn, cacdaún(Input)cuànôđđđđđđđb dahdàú is "dachstieu".
- Nodes: Nodes in the membrane are closely related to the alkaline properties of the membrane. If you have the right personality, you're right, you're right. "tieu", the button will be the same as that of the day.
- Origin of the translation: If the translation comes from the temple, it will be What kind of service can you enter into the block? I will be considered unsuitable and disqualified.
- Chec dongthàn: The more you are included in the translation, the more complete the calculation will be.scratching and spreading the disease even more blatantly, the background cannot be dug up.

If a group of miners has more than 50% of the total power (Hashràtì) of the membrane, they will be able to reach a certain number of workers and will be sold by the teacher.

Behaviors they CAN do:

- Dao nguuu dia của chínhho: Thu nhng nhng vic vo tiudup (DoublênSpênding)
The eagle is a millionaire.
- Thousand Guys Translation:Hoco swears to be angry at home and at home.
translation doknot swear to be brought in.
